Good afternoon,

Robotic Assistance Devices' mission is to deliver artificial intelligence-based solutions that empower organizations to solve complex challenges while delivering immediate return on investment. Our company was founded on the belief that next-generation solutions can help organizations streamline operations, increase ROI and strengthen business. RAD technology improves the simplicity and economics of patrolling and guard services and allows experienced personnel to focus on more strategic tasks. Customers augment the capabilities of existing staffs and gain higher levels of situational awareness, all at drastically reduced cost.

Our solutions cover the following features,

- access control,
- remote monitoring
- people counting
- safety alerts (information buttons)Emergency phone
- concierge services
- VRVM (Verified Response Visitor Management) – unique to the RAD solution, this is Visitor Management that can be officer assists
- BOLO assistance with MAC address and licenses
- Facial Recognition Entry to assist
- Information such as parking, facility/etc

Are you free for a webinar on June 28th at 12pm PST?

Best Regards,

Jordan Lippel, CPP
